

TYPO3

From Vulnerability to Stability: Inside TP03's Security Process

 SO MEN'SIGHTS INTO - REGRESSION

TYP03-CORE-SA-2021-013:

Cross-Site Scripting via

Rich-Text Content

- **Problem:** `HtmlParser` functionality vulnerable to XSS in RTE

- **Solution:** *typo3/html-sanitizer* package with explicitly allowed tags, attributes and values

- **Regressions:** Due to strict defaults
(mostly edge cases)

TYP03-CORE-SA-2025-014:
Unrestricted File Upload in File
Abstraction Layer

- **Problem:** Mismatch between file extension and MIME type

- **Solution:** MIME type consistency check and enforcement of allowed file extensions only

- **Regressions:** Due to different behaviors and missing standards

TYPO3-CORE-SA-2021-013: Cross-Site Scripting via Rich-Text Content

- **Problem:** HtmlParser functionality vulnerable to XSS in RTE
- **Solution:** *typo3/html-sanitizer* package with explicitly allowed tags, attributes and values
