

TYP03

From Vulnerability to Stability: Inside TP03's Security Process

WHAT WE DO TO HARDEN THE „FUTURE TYPE 3“ - SAS

We're planning to integrate

asAST job in the TYP O3 workflow.

Static Application Security Testing

- Code is analyzed for insecure patterns & known vulnerabilities (White-Box-Testing)

- Part of pre-merge CI pipeline (every patch)
to establish a **Continuous Security** workflow

An orange starburst graphic with multiple points, centered on a white background. The text "[WIP]" is written in white, bold, italicized capital letters across the center of the starburst.

[WIP]

We're **planning** to integrate a **SAST** job in the TYPO3 workflow.

- **Static Application Security Testing**
- Code is analyzed for **insecure patterns** & known **vulnerabilities** (White-Box-Testing)
- Part of pre-merge CI pipeline (every patch) to establish a **Continuous Security** workflow
